

1. Carry out the following matrix calculations.

$$(0 \ 1 \ 0) \begin{pmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \\ a_{31} & a_{32} & a_{33} \end{pmatrix} \begin{pmatrix} 1 \\ 0 \\ 0 \end{pmatrix}$$

and

$$(0 \ 1 \ 0) \begin{pmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \\ a_{31} & a_{32} & a_{33} \end{pmatrix} \begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix}$$

2. What matrix multiplication would you do if you wanted the answer to be a_{31} ?

3. In the first question above, the bra/ket representations for the calulations are:

$$\langle 2 | A | 1 \rangle = ? \quad \text{and} \quad \langle 2 | A | 2 \rangle = ?$$

Write the second question in bra/ket notation.
