

# Contour Maps for **Thermo States** Activity and Printing Directions

September 3, 2020

## 1 Printing Directions

The contour maps are scaled to match the surfaces, which have top dimensions of 7.833 inches by 7.826 inches. <sup>1</sup> However, certain print settings can interfere with the contour maps matching the scale of the surfaces. To ensure a match, be sure to:

1. This contour maps is designed to be printed in Portrait Mode.
2. Select 'Print Actual Size' or set the scaling to '100%'. Choosing 'Fit to Page' squishes and stretches the contour map onto the page.
3. The margin on the page may be as narrow as 0.25 inches.
4. If including the contour maps in Microsoft Word, keep the aspect ratio and do not rescale the images.
